Gustavo Cunha

Father of two boys, married, big fan of Code, Lego and Planes, I’ve been working with Web Development since 2003 and currently I’m a Tech Lead at KPN.

I like to work in a group, research new things, come with solutions to solve problems, especially the tough ones. I am very interested in mentoring, continuous learning and knowledge sharing. I enjoy challenges.

Fluent in: English, Portuguese

Experiences

KPN

(Apr / 2018 - Currently)

Tech Lead at Platform Team working with Python 3, API development, micro-services, Kubernetes, CI/CD deployment and development of support tools to ensure non-disruptive operations.

Main achievements: Migration from on-premises codebase to cloud-native applications, team growth over hiring process, reduce silos through knowledge sharing sessions, launch of key programs and API migrations, cross-team iPhone pre-order launch with 0 downtime for multiple years. Led paved road migration from Bitbucket to Github, enabling over 20 teams and hundreds of repositories to be migrated smoothly. On-duty company devops team lead since January/2021.

Role changes: In Sept/2021, I was promoted to the next scale at KPN and took over the role of Team Lead. In Jun/2022, my role was changed to Tech Lead, following an internal career reorganisation.
